I would like information on including Rainbow Network in my will or estate.

It is our mission to share in the love of Jesus Christ by partnering with Nicaragua's poorest people in healthcare, education, economic development, and housing.

This family received a new home, the kids go to school, the doctor cares for them all, and mom has started her own business with a microloan.

Fighting poverty by creating leaders in Nicaragua who have hope for a better tomorrow.

## Public Health & Medical

Rainbow Network operates health care clinics in each community, issuing medicine and health care education on a regular basis. We have full time doctors on staff who operate the health care clinics.

Our extensive public health programs include feeding centers where thousands of malnourished children, at-risk elderly, and pregnant and nursing mothers are fed a nutritious, hot meal five days a week. Other public health programs include vaccinations, parasite control, drinking water purification, sanitary latrines, and more.

## Sponsorship and Education

Rainbow Network makes it possible for hundreds of students to attend high school through sponsorships. For just \$25 a month a sponsor provides a student with the life-long gift of education. Many students are waiting for sponsors today.

There is a tremendous hunger for education within the children and youth of Nicaragua. Rainbow Network is also committed to enhancing elementary education by providing books, school supplies, and teachers to thousands of elementary students.

## Safe and Clean Housing

Most families consist of two or three generations living together in dirt floor huts so small that they may sleep in shifts at night. Each year, Rainbow Network places many families into newly constructed homes.

All homes are built with the assistance of the new homeowners and are sold to them with Rainbow financing.

## Economic Aid Microloans

The unemployment rate is 70 % in rural Nicaragua and in order to create an income, many Nicaraguans establish micro businesses. Rainbow Network encourages this by providing loans and practical business training to families. These loans not only increase monthly income, but also enhance self worth, creativity, and responsibility.

Hundreds of families use loans for vegetable production, to buy livestock, manufacture clothing and furniture, to buy and re-sell basic grocery items and more.
